VOLUME X

SUBJECT INDEX.

Accessories.
Some Testing-Laboratory —. J. M. Porter, 563.
Addresses.
See **Memorial Session.**
Aluminates.
—: Their Properties and Possibilities in Cement Manufacture. Henry S. Spackman, 315. Discussion, 324.
American Society for Testing Materials.
Officers, Members of the Executive Committee, and Standing Committees of the —, 651.
Past Officers of the —, 652.
Standing Advisory Committees of the —, 653.
Annealing.
Further Notes on the — of Steel. William Campbell, 193.
Annual Meeting.
Summary of the Proceedings of the Thirteenth —, 7.
Apparatus.
— for Repeated Loads on Concrete Cylinders and a Typical Result. H. C. Berry, 581. Discussion, 587.
— for the Microscopical Examination of Metals. Albert Sauveur, 518.
Arbitration Test Bars.
Tests of Cast-Iron —. C. D. Mathews, 299. Discussion, 306.
Autographic.
An — Rubber-Testing Machine. Thorsten Y. Olsen, 588.

Bars.
Tests of Cast-Iron Arbitration Test —. C. D. Mathews, 299. Discussion, 306.
Beams.
An Investigation of the Distribution of Stress in Reinforced Concrete —, including a Comparative Study of Plain Concrete in Tension and Compression. A. T. Goldbeck, 376.
Strength of Steel from I —. E. L. Hancock, 248. Discussion, 258.
Tests of Steel and Wrought-Iron —. H. F. Moore, 233. Discussion, 246.
Bessemer.
The Influence of Titanium on Segregation in — Rail Steel. G. B. Waterhouse, 201. Discussion, 210.
Bitumen.
The Determination of Soluble —. Prévost Hubbard and C. S. Reeve, 420. Discussion, 432.

VOLUME X

SUBJECT INDEX.

Accessories.
Some Testing-Laboratory —. J. M. Porter, 563.
Addresses.
See **Memorial Session.**
Aluminates.
—: Their Properties and Possibilities in Cement Manufacture. Henry S. Spackman, 315. Discussion, 324.
American Society for Testing Materials.
Officers, Members of the Executive Committee, and Standing Committees of the —, 651.
Past Officers of the —, 652.
Standing Advisory Committees of the —, 653.
Annealing.
Further Notes on the — of Steel. William Campbell, 193.
Annual Meeting.
Summary of the Proceedings of the Thirteenth —, 7.
Apparatus.
— for Repeated Loads on Concrete Cylinders and a Typical Result. H. C. Berry, 581. Discussion, 587.
— for the Microscopical Examination of Metals. Albert Sauveur, 518.
Arbitration Test Bars.
Tests of Cast-Iron —. C. D. Mathews, 299. Discussion, 306.
Autographic.
An — Rubber-Testing Machine. Thorsten Y. Olsen, 588.

Bars.
Tests of Cast-Iron Arbitration Test —. C. D. Mathews, 299. Discussion, 306.
Beams.
An Investigation of the Distribution of Stress in Reinforced Concrete —, including a Comparative Study of Plain Concrete in Tension and Compression. A. T. Goldbeck, 376.
Strength of Steel from I —. E. L. Hancock, 248. Discussion, 258.
Tests of Steel and Wrought-Iron —. H. F. Moore, 233. Discussion, 246.
Bessemer.
The Influence of Titanium on Segregation in — Rail Steel. G. B. Waterhouse, 201. Discussion, 210.
Bitumen.
The Determination of Soluble —. Prévost Hubbard and C. S. Reeve, 420. Discussion, 432.

Bituminous Materials.
Improved Instruments for the Physical Testing of —. Herbert Abraham, 444. Discussion, 452.
Blowholes.
The Welding of — in Steel. Henry M. Howe, 169.
Brick.
Standard Specifications for Paving and Building —. Report of Committee C-3, 96. Discussion, 98.
Bridge.
Inspection of the Havre de Grace —. Report of Sub-Committee B of Committee D-1, 105.
Standard Specifications for Yellow-Pine — and Trestle Timbers, 159.
Building Brick.
See **Brick.**

Calibration.
The 600,000-lb. Hydraulic Testing Machine of the University of Wisconsin and Its —. H. F. Moore and M. O. Withey, 551. Discussion, 561.
Carbon Streaks.
Low — in Open-Hearth Rails. M. H. Wickhorst, 212. Discussion, 218.
Car Wheels.
Unevenly Chilled and Untrue —. Thomas D. West, 307.
Castings.
Standard Specifications for Cast Iron and Finished —. Report of Committee A-3, 70.
Cast Iron.
Some Recent Tests of —. Alexander E. Outerbridge, Jr., 295.
Standard Specifications for — and Finished Castings. Report of Committee A-3, 70.
Tests of — Arbitration Test Bars. C. D. Mathews, 299. Discussion, 306.
Cement (see also **Concrete**).
Aluminates: Their Properties and Possibilities in — Manufacture. Henry S. Spackman, 315. Discussion, 324.
Comparative Tests of Lime Mortar, both in Tension and Compression: Hydrated Lime and Sand; Lump Lime and Sand; — Lime and Sand. E. W. Lazell, 328.
Standard Specifications and Tests for Clay and — Sewer Pipes. Report of Committee C-4, 101.
The Painting of — and Concrete Structures. Charles Macnichol, 396. Discussion, 399.
Cement Manufacture.
See **Cement.**
Classification.
The — of Fine Particles According to Size. G. W. Thompson, 601. Discussion, 615.

Clay.
Standard Specifications and Tests for — and Cement Sewer Pipes. Report of Committee C-4, 101.
Coatings (see also **Paint**).
Another Solubility Test on Protective —. G. W. Thompson, 417.
Preservative — for Structural Materials. Report of Committee D-1, 102. Discussion, 87.
Some Exposure Tests of Structural-Steel —. C. M. Chapman, 401. Discussion, 409.
Cold-Drawn Steel.
Standard Specifications for —. Report of Committee A-8, 92.
Columns.
Tests of Reinforced Concrete — Subjected to Repeated and Eccentric Loads. M. O. Withey, 361.
Committee Reports.
Committee A-1 on Standard Specifications for Steel, 54.
Committee A-3 on Standard Specifications for Cast Iron and Finished Castings, 70.
Committee A-5 on the Corrosion of Iron and Steel, 73. Discussion, 87.
Joint Sub-Committee in Charge of Erection and Painting of Steel Test Panels at Atlantic City, 79.
Committee A-8 on Standard Specifications for Cold-Drawn Steel, 92.
Committee A-10 on Standard Specifications for Staybolt Iron, 93.
Committee C-3 on Standard Specifications for Paving and Building Brick, 96. Discussion, 98.
Committee C-4 on Standard Specifications and Tests for Clay and Cement Sewer Pipes, 101.
Committee D-1 on Preservative Coatings for Structural Materials, 102. Discussion, 87.
Sub-Committee B on Inspection of Havre de Grace Bridge, 105.
Sub-Committee C on Inspection of the Wooden Panels at Atlantic City, 107.
Sub-Committee E on Linseed Oil, 113.
Sub-Committee G on the Influence of Pigments on Corrosion, 115.
Sub-Committee I on Varnish, 116.
Committee D-2 on Standard Tests for Lubricants, 117.
Committee D-3 on Standard Methods of Analysis of Fats and Oils, 147.
Committee D-4 on Standard Tests for Road Materials, 149. Discussion, 154.
Committee D-7 on Standard Specifications for the Grading of Structural Timber, 155.
Committee D-8 on Waterproofing Materials, 162. Discussion, 165.
Concrete (see also **Cement**).
An Investigation of the Distribution of Stress in Reinforced — Beams, including a Comparative Study of Plain — in Tension and Compression. A. T. Goldbeck, 376.

Concrete (*Continued*).
Apparatus for Repeated Loads on — Cylinders and a Typical Result. H. C. Berry, 581. Discussion, 587.
Tests of Reinforced — Columns Subjected to Repeated and Eccentric Loads. M. O. Withey, 361.
The Effect of Sodium Silicate Mixed with or Applied to —. Albert Moyer, 351. Discussion, 356.
The Painting of Cement and — Structures. Charles Macnichol, 396. Discussion, 399.
Copper-Clad Steel.
—: Its Metallurgy, Properties and Uses. Wirt Tassin, 280. Discussion, 292.
Corrosion.
The — of Iron and Steel. Report of Committee A-5, 73. Discussion, 87.
The Influence of Pigments on —. Report of Sub-Committee G of Committee D-1, 115.
Cupro-Nickel Steel.
—. G. H. Clamer, 267. Discussion, 274.
Cylinders.
Apparatus for Repeated Loads on Concrete — and a Typical Result. H. C. Berry, 581. Discussion, 587.
Distribution of Stress.
An Investigation of the — in Reinforced Concrete Beams, including a Comparative Study of Plain Concrete in Tension and Compression. A. T. Goldbeck, 376.
Drop-Testing Machine.
Elongation and Ductility Tests of Rail Sections under the Manufacturers' Standard —. P. H. Dudley, 223.
Ductility.
Elongation and — Tests of Rail Sections under the Manufacturers Standard Drop-Testing Machine. P. H. Dudley, 223.
Dudley Memorial Session.
See **Memorial Session.**
Eccentric Loads.
Tests of Reinforced Concrete Columns Subjected to Repeated and —. M. O. Withey, 361.
Electric Current.
Test of a Structural-Steel Plate Partly Fused by a Short-Circuited —. A. W. Carpenter, 259.
Elongation.
— and Ductility Tests of Rail Sections under the Manufacturers' Standard Drop-Testing Machine. P. H. Dudley, 223.
Endurance Tests.
The Exponential Law of —. O. H. Basquin, 625.

Exponential Law.
The — of Endurance Tests. O. H. Basquin, 625.
Exposure Tests.
Some — of Structural-Steel Coatings. C. M. Chapman, 401. Discussion, 409.

Fats.
Standard Methods of Analysis of — and Oils. Report of Committee D-3, 147.
Fine Particles.
The Classification of — According to Size. G. W. Thompson, 601. Discussion, 615.
Forest Products Laboratory.
The —: Its Purpose and Work. McGarvey Cline, 477.
Fuel.
— Investigations, United States Geological Survey: Progress During the Year Ending June 30, 1910. J. A. Holmes, 472.

Geological Survey, United States.
Fuel Investigations, —: Progress During the Year Ending June 30, 1910. J. A. Holmes, 472.
The Structural Materials Testing Laboratories, —: Progress During the Year Ending June 30, 1910. Richard L. Humphrey, 631.

Hardness.
General Discussion on —, 502.
Havre de Grace Bridge.
See **Bridge.**
Hydraulic Testing Machine.
The 600,000-lb. — of the University of Wisconsin and Its Calibration. H. F. Moore and M. O. Withey, 551. Discussion, 561.

I-Beams.
See **Beams.**
Inspection.
— of the Havre de Grace Bridge. Report of Sub-Committee B of Committee D-1, 105.
— of the Wooden Panels at Atlantic City. Report of Sub-Committee C of Committee D-1, 107.
Instruments.
Improved — for the Physical Testing of Bituminous Materials. Herbert Abraham, 444. Discussion, 452.
Iron.
Some Recent Tests of Cast —. Alexander E. Outerbridge, Jr., 295.
Standard Specifications for Cast — and Finished Castings. Report of Committee A-3, 70.
Standard Specifications for Staybolt —, 94.
Standard Specifications for Staybolt —. Report of Committee A-10, 93.

Iron (*Continued*).
Tests of Cast — Arbitration Test Bars. C. D. Mathews, 299. Discussion, 306.
Tests of Steel and Wrought — Beams. H. F. Moore, 233. Discussion, 246.
The Corrosion of — and Steel. Report of Committee A-5, 73. Discussion, 87.

Lime.
Comparative Tests of — Mortar, both in Tension and Compression: Hydrated — and Sand; Lump — and Sand; Cement — and Sand. E. W. Lazell, 328.

Lime Mortar.
See **Mortar.**

Linseed Oil.
—. Report of Sub-Committee E of Committee D-1, 113.

Lubricants.
Standard Tests for —. Report of Committee D-2, 117.

Machine (see also **Accessories, Apparatus, Instruments, Testing Machine**).
An Autographic Rubber-Testing —. Thorsten Y. Olsen, 588.
A New — for Testing Pitch. Thorsten Y. Olsen, 592. Discussion, 595.
Elongation and Ductility Tests of Rail Sections under the Manufacturers' Standard Drop-Testing —. P. H. Dudley, 223.
The 600,000-lb. Hydraulic Testing — of the University of Wisconsin and Its Calibration. H. F. Moore and M. O. Withey, 551. Discussion, 561.

Magnetic.
A Comparison of — Permeameters. Charles W. Burrows, 616.

Memorial Session.
Addresses at —, 21.
Introductory Remarks by the Vice-President, Mr. Robert W. Lesley, 21.
Charles B. Dudley as a Railroad Man. Theodore N. Ely, 24.
Charles B. Dudley as a Chemist. Edgar F. Smith, 31.
Charles B. Dudley as a Metallurgist. Henry M. Howe, 34.
Charles B. Dudley as a Mentor. B. W. Dunn, 38.
Charles B. Dudley as a Citizen. W. H. Schwartz, 44.
Charles B. Dudley—A Personal Tribute. Robert W. Hunt, 51.
Dudley —: Program of Exercises, 19.

Metals.
Apparatus for the Microscopical Examination of —. Albert Sauveur, 518.

Microscopical Examination.
Apparatus for the — of Metals. Albert Sauveur, 518.

Mortar.
Comparative Tests of Lime —, both in Tension and Compression: Hydrated Lime and Sand; Lump Lime and Sand; Cement-Lime and Sand. E. W. Lazell, 328.

Nickel.
Cupro — Steel. G. H. Clamer. 267. Discussion, 274.

Oils.
Standard Methods of Analysis of Fats and —. Report of Committee D-3, 147.

Open-Hearth.
Low-Carbon Streaks in — Rails. M. H. Wickhorst, 212. Discussion, 218.

Paint (see also **Coatings, Preservative Coatings, Protective Coatings**).
Vermilion — for Railway Signals: Results of an Investigation Robert Job, 414.

Painting.
Erection and — of Steel Test Panels at Atlantic City. Report of Joint Sub-Committee of Committees A-5 and D-1, 79.
The — of Cement and Concrete Structures. Charles Macnichol, 396. Discussion, 399.

Paving Brick.
See **Brick.**

Permeameters.
A Comparison of Magnetic —. Charles W. Burrows, 616.

Petroleum.
Necessary Reforms in Specifications for — Products. Albert Sommer, 458. Discussion, 470.

Pigments.
The Influence of — on Corrosion. Report of Sub-Committee G of Committee D-1, 115.

Pitch.
A New Machine for Testing —. Thorsten Y. Olsen, 592. Discussion, 595.

Plate.
Test of a Structural-Steel — Partly Fused by a Short-Circuited Electric Current. A. W. Carpenter, 259.

Preservative Coatings (see also **Paint**).
— for Structural Materials. Report of Committee D-1. 102. Discussion, 87.

Proceedings.
Summary of the — of the Thirteenth Annual Meeting, 7.

Protective Coatings (see also **Paint**).
Another Solubility Test on —. G. W. Thompson, 417.

Rails.
Elongation and Ductility Tests of Rail Sections under the Manufacturers' Standard Drop-Testing Machine. P. H. Dudley, 223.
Low-Carbon Streaks in Open-Hearth —. M. H. Wickhorst, 212. Discussion, 218.
The Influence of Titanium on Segregation in Bessemer-Rail Steel. G. B. Waterhouse, 201. Discussion, 210.

Railway.
Vermilion Paint for — Signals: Results of an Investigation. Robert Job, 414.
Reforms.
Necessary — in Specifications for Petroleum Products. Albert Sommer, 458. Discussion, 470.
Reinforced Concrete.
See **Concrete.**
Repeated Loads.
Apparatus for — on Concrete Cylinders and a Typical Result. H. C. Berry, 581. Discussion, 587.
Tests of Reinforced Concrete Columns Subjected to Repeated and Eccentric Loads. M. O. Withey, 361.
Road Materials.
Standard Tests for —. Report of Committee D-4, 149. Discussion, 154.
Rubber.
An Autographic — Testing Machine. Thorsten Y. Olsen, 588.

Sand.
A — Specification and Its Specific Application. W. A. Aiken, 341. Discussion, 349.
Comparative Tests of Lime Mortar, both in Tension and Compression: Hydrated Lime and —; Lump Lime and —; Cement-Lime and —. E. W. Lazell, 328.
Scleroscope.
The —. Albert F. Shore, 490. Discussion, 502.
Segregation.
The Influence of Titanium on — in Bessemer-Rail Steel. G. B. Waterhouse, 201. Discussion, 210.
Sewer Pipes.
Standard Specifications and Tests for Clay and Cement —. Report of Committee C-4, 101.
Signals.
Vermilion Paint for Railway —: Results of an Investigation. Robert Job, 414.
Sodium Silicate.
The Effect of — Mixed with or Applied to Concrete. Albert Moyer, 351. Discussion, 356.
Solubility.
Another — Test on Protective Coatings. G. W. Thompson, 417.
Soluble Bitumen.
See **Bitumen.**
Specifications.
A Sand Specification and Its Specific Application. W. A. Aiken, 341. Discussion, 349.
Necessary Reforms in — for Petroleum Products. Albert Sommer, 458. Discussion, 470.

Specifications (*Continued*).
Standard — for Staybolt Iron, 94.
Standard — for Yellow-Pine Bridge and Trestle Timbers, 159.
Standard Specifications.
See **Specifications.**
Staybolt Iron.
Standard Specifications for —, 94.
Standard Specifications for —. Report of Committee A-10, 93.
Steel.
Copper-Clad —: Its Metallurgy, Properties and Uses. Wirt Tassin, 280. Discussion, 292.
Cupro-Nickel —. G. H. Clamer, 267. Discussion, 274.
Further Notes on the Annealing of —. William Campbell, 193.
Some Exposure Tests of Structural — Coatings. C. M. Chapman, 401. Discussion, 409.
Standard Specifications for Cold-Drawn —. Report of Committee A-8, 92.
Standard Specifications for —. Report of Committee A-1, 54.
Strength of — from I-Beams. E. L. Hancock, 248. Discussion, 258.
Test of a Structural — Plate Partly Fused by a Short-Circuited Electric Current. A. W. Carpenter, 259.
Tests of — and Wrought-Iron Beams. H. F. Moore, 233. Discussion, 246.
The Corrosion of Iron and —. Report of Committee A-5, 73. Discussion, 87.
The Influence of Titanium on Segregation in Bessemer-Rail —. G. B. Waterhouse, 201. Discussion, 210.
The Welding of Blowholes in —. Henry M. Howe, 169.
Steel Test Panels.
Erection and Painting of — at Atlantic City. Report of Joint Sub-Committee of Committees A-5 and D-1, 79.
Structural Materials.
Preservative Coatings for —. Report of Committee D-1, 102. Discussion, 87.
The — Testing Laboratories, United States Geological Survey: Progress During the Year Ending June 30, 1910. Richard L. Humphrey, 631.
Structural Steel (see also **Steel**).
Some Exposure Tests of — Coatings. C. M. Chapman, 401. Discussion, 409.
Test of a — Plate Partly Fused by a Short-Circuited Electric Current. A. W. Carpenter, 259.
Structural Timber.
See **Timber.**
Structures.
The Painting of Cement and Concrete —. Charles Macnichol, 396. Discussion, 399.

Test Bars.
See **Arbitration Test Bars.**
Testing (see also **Tests**).
A New Machine for — Pitch. Thorsten Y. Olsen, 592. Discussion, 595.
Improved Instruments for the Physical — of Bituminous Materials. Herbert Abraham, 444. Discussion, 452.
Some — Laboratory Accessories. J. M. Porter, 563.
Testing-Laboratory.
Some — Accessories. J. M. Porter, 563.
Testing Machine (see also **Accessories, Apparatus, Instruments, Machine**).
An Autographic Rubber —. Thorsten Y. Olsen, 588.
Elongation and Ductility Tests of Rail Sections under the Manufacturers' Standard Drop —. P. H. Dudley, 223.
The 600,000-lb. Hydraulic — of the University of Wisconsin and Its Calibration. H. F. Moore and M. O. Withey, 551. Discussion, 561.
Tests (see also **Testing**).
Another Solubility Test on Protective Coatings. G. W. Thompson, 417.
Comparative — of Lime Mortar, both in Tension and Compression: Hydrated Lime and Sand; Lump Lime and Sand; Cement-Lime and Sand. E. W. Lazell, 328.
Elongation and Ductility — of Rail Sections under the Manufacturers' Standard Drop-Testing Machine. P. H. Dudley, 223.
Some Exposure — of Structural-Steel Coatings. C. M. Chapman, 401. Discussion, 409.
Some Recent — of Cast Iron. Alexander E. Outerbridge, Jr., 295.
Test of a Structural-Steel Plate Partly Fused by a Short-Circuited Electric Current. A. W. Carpenter, 259.
— of Cast-Iron Arbitration Test Bars. C. D. Mathews, 299. Discussion, 306.
— of Reinforced Concrete Columns Subjected to Repeated and Eccentric Loads. M. O. Withey, 361.
— of Steel and Wrought-Iron Beams. H. F. Moore, 233. Discussion, 246.
The Exponential Law of Endurance —. O. H. Basquin, 625.
Timber.
Standard Specifications for the Grading of Structural —. Report of Committee D-7, 155.
Standard Specifications for Yellow-Pine Bridge and Trestle Timbers, 159.
Titanium.
The Influence of — on Segregation in Bessemer-Rail Steel. G. B. Waterhouse, 201. Discussion, 210.
Trestle.
Standard Specifications for Yellow-Pine Bridge and — Timbers, 159.

Varnish.
—. Report of Sub-Committee I of Committee D-1, 116.
Vermilion Paint.
See **Paint.**

Waterproofing Materials.
—. Report of Committee D-8, 162. Discussion, 165.
Welding.
The — of Blowholes in Steel. Henry M. Howe, 169.
Wheels.
See **Car Wheels.**
Wooden Panels.
Inspection of the — at Atlantic City. Report of Sub-Committee C of Committee D-1, 107.
Wrought Iron.
Tests of Steel and — Beams. H. F. Moore, 233. Discussion, 246.

AUTHOR INDEX.

Discussion, 399, 400.
Marburg, Edgar.
Report of Committee A-1 on Standard Specifications for Steel, 54.
Discussion, 246, 258.
Mathews, C. D.
Tests of Cast-Iron Arbitration Test Bars, 299.
Mathews, John A.
Discussion, 274.
Moldenke, Richard.
Report of Committee A-3 on Standard Specifications for Cast Iron and Finished Castings, 70.
Discussion, 306.
Moore, H. F.
Tests of Steel and Wrought-Iron Beams, 233.
The 600,000-lb. Hydraulic Testing Machine of the University of Wisconsin and Its Calibration, 551.
Discussion, 246, 247, 561.
Moyer, Albert.
The Effect of Sodium Silicate Mixed with or Applied to Concrete, 351.
Discussion, 358, 360.

Olsen, Thorsten Y.
An Autographic Rubber-Testing Machine, 588.
A New Machine for Testing Pitch, 592.
Outerbridge, Alexander E., Jr.
Some Recent Tests of Cast Iron, 295.

Page, L. W.
Report of Committee C-3 on Standard Specifications for Paving and Building Brick, 96.
Report of Committee D-4 on Standard Tests for Road Materials, 149.
Discussion, 98, 99.

Parker, J. H.
Discussion, 507.
Porter, J. M.
Some Testing-Laboratory Accessories, 563.
Discussion, 247.
Provost, A. J., Jr.
Report of Committee C-4 on Standard Specifications and Tests for Clay and Cement Sewer Pipes, 101.
Pullar, H. B.
Discussion, 456.

Reeve, C. S.
The Determination of Soluble Bitumen, 420.
Discussion, 441.
Reynders, J. V. W.
Discussion, 278.
Richardson, Clifford.
Discussion, 327.

Sauveur, Albert.
Apparatus for the Microscopical Examination of Metals, 518.
Schuyler, Mont.
Discussion, 247, 293, 349, 587, 597, 598.
Schwartz, W. H.
Charles B. Dudley as a Citizen, 44.
Shore, Albert F.
The Scleroscope, 490.
Discussion, 507, 508, 509, 510, 511, 516.
Skinner, C. E.
Report of Committee A-8 on Standard Specifications for Cold-Drawn Steel, 92.
Discussion, 452.
Smith, Edgar F.
Charles B. Dudley as a Chemist, 31.
Smith, H. E.
Discussion, 470.
Sommer, Albert.
Necessary Reforms in Specifications for Petroleum Products, 458.
Discussion, 440, 470, 471, 598, 599.
Souther, Henry.
Discussion, 210, 246, 278.
Spackman, Henry S.
Aluminates: Their Properties and Possibilities in Cement Manufacture, 315.
Discussion, 324, 325, 326, 327, 359.
Stevenson, A. A.
Discussion, 210.
Stoughton, Bradley.
Discussion, 512.

Tassin, Wirt.
Copper-Clad Steel: Its Metallurgy, Properties and Uses, 280.
Discussion, 88, 292, 293.
Thompson, G. W.
Report of Committee D-1 on Preservative Coatings for Structural Materials, 102.
Report of Sub-Committee E, of Committee D-1, on Linseed Oil, 113.
Another Solubility Test on Protective Coatings, 417.
The Classification of Fine Particles According to Size, 601.
Discussion, 615.

Von Schrenk, Hermann.
Report of Committee D-7 on Standard Specifications for the Grading of Structural Timber, 155.
Voorhees, S. S.
Report of Committee D-1 on Preservative Coatings for Structural Materials, 102.
Discussion, 87, 90.

Waldo, Leonard.
Discussion, 293, 294, 324, 561.
Walker, P. H.
Discussion, 88, 615.
Walker, W. H.
Report of Committee A-5 on the Corrosion of Iron and Steel, 73.
Report of Sub-Committee G, of Committee D-1, on the Influence of Pigments on Corrosion, 115.
Warner, G. C.
Discussion, 599.
Waterhouse, G. B.
The Influence of Titanium on Segregation in Bessemer-Rail Steel, 201.
Discussion, 210, 211.
Webster, William R.
Report of Committee A-1 on Standard Specifications for Steel, 54.
West, Thomas D.
Unevenly Chilled and Untrue Car Wheels, 307.
White, G. D.
Discussion, 360.
Wickhorst, M. H.
Low-Carbon Streaks in Open-Hearth Rails, 212.
Discussion, 221.
Wille, H. V.
Report of Committee A-10 on Standard Specifications for Staybolt Iron, 93.
Withey, M. O.
Tests of Reinforced Concrete Columns Subjected to Repeated and Eccentric Loads, 361.

Withey, M. O. (*Continued*).
The 600,000-lb. Hydraulic Testing Machine of the University of Wisconsin and Its Calibration, 551.
Wood, Walter.
Report of Committee A-3 on Standard Specifications for Cast Iron and Finished Castings, 70.
Discussion, 306.
